

Integrated Monarch Monitoring Program (IMMP)

Saturday, April 13, 2019
9:30am – 3:00pm*
Brukner Nature Center
5995 Horseshoe Bend Rd.
Troy, OH 45373

The IMMP uses a random sampling design to select monitoring sites in an unbiased way to monitor monarchs and evaluate their habitats to inform monarch conservation efforts. After attending the training, you may choose to assist with monitoring at BNC's Rivers' Edge, to adopt a random IMMP site (see back), or select your own 1+ acre site.

At this training event, you will learn:

- ◆ Status and conservation of monarchs
- ◆ Development and purpose of the IMMP
 - ◆ How to select a site to monitor
- ◆ How to submit data to the national database
- ◆ How to monitor milkweed, nectar plants, and monarch eggs and larva*

Cost to attend is just \$25 and includes all printed materials, lunch, and snacks. Monitoring kits are available for additional cost through Monarch Joint Venture.

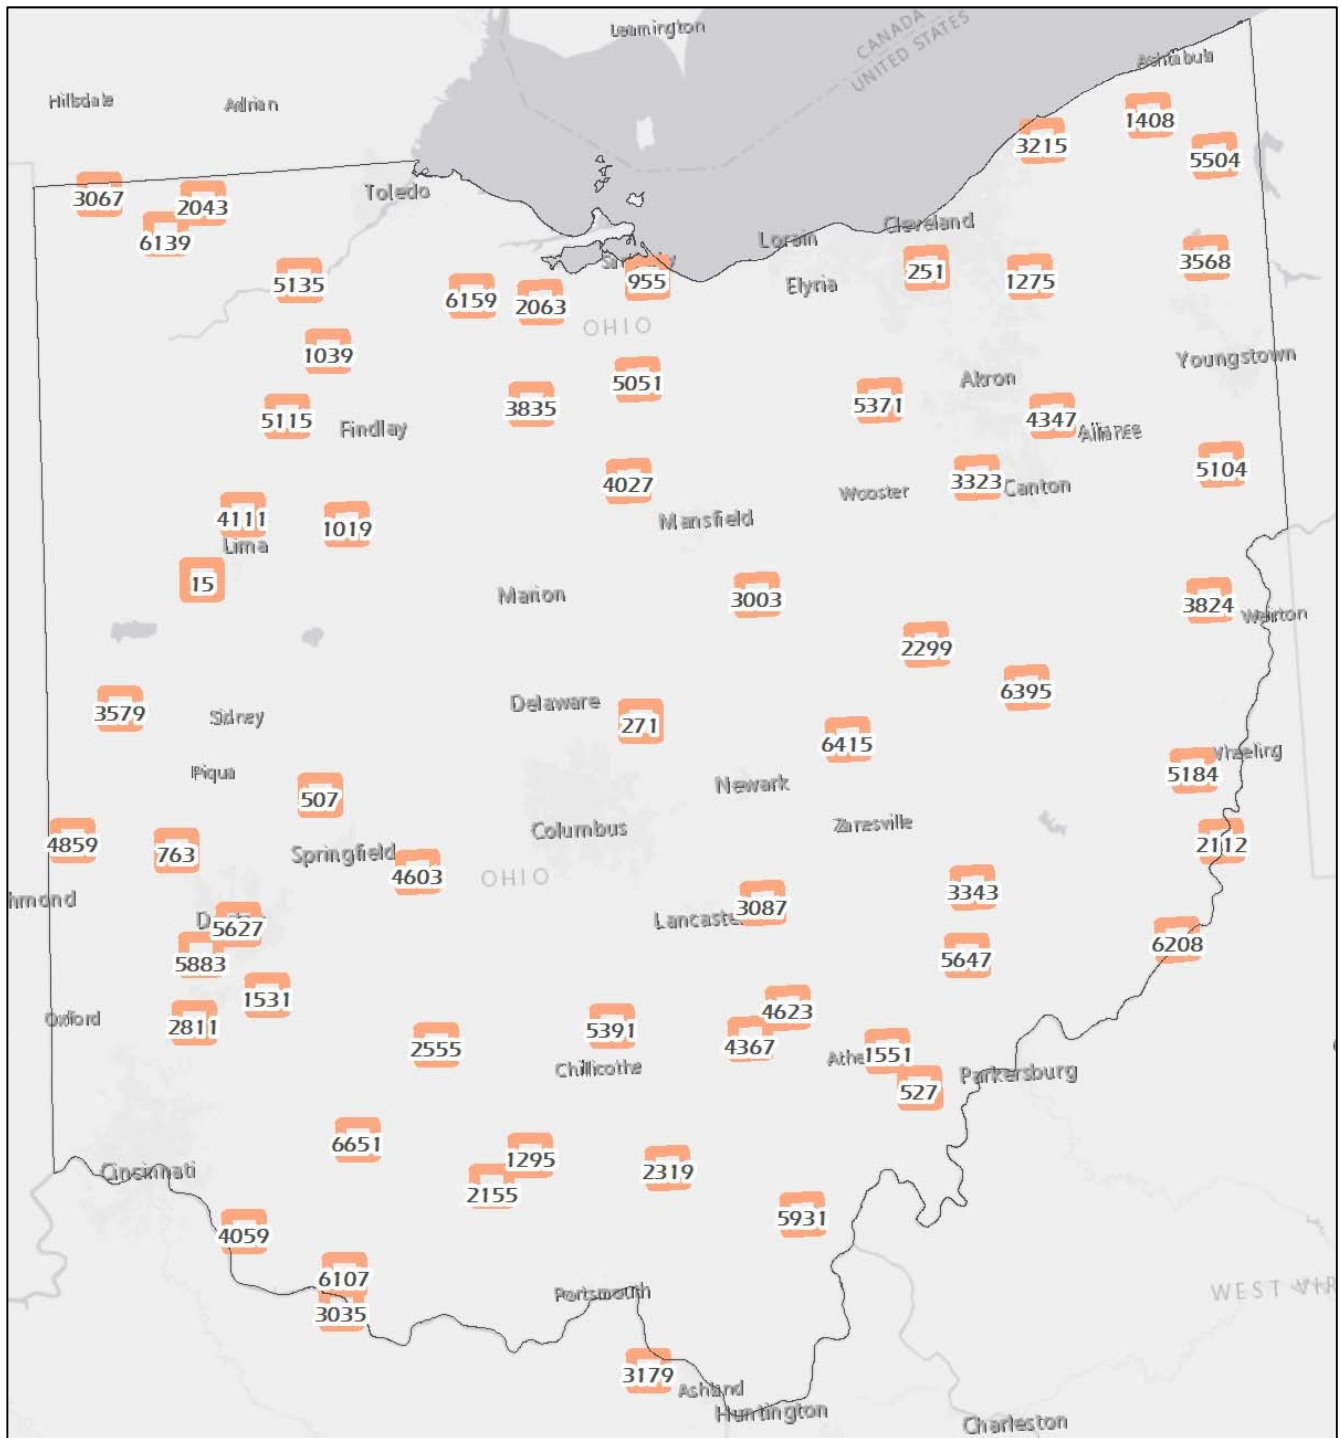

Space is limited; register by April 8 by calling Brukner Nature Center at 937-698-6493 or emailing info@bruknernaturecenter.com.

*You can also complete classroom activities online in advance and attend just the group field exercises from 1:30-3:00pm for a reduced cost. Ask us how!
