

Summer Field Day
13 July 2019, 8:30-3:30

Little Lives, Big Impacts

The Wilderness Center ~ Wilmot, Ohio

The tiniest denizens of our fields, forests, and wetlands are often the most overlooked, but their impacts on ecosystem dynamics are huge. Celebrate these tiny lives and learn to take a closer look at the world around you. Hands-on activities include making a homemade macro lens for your phone, investigating forest floor organisms, techniques for finding tiny critters, and more.

Keynote: Chasing Bugs - Danae Wolfe

From steadfast survival and pollination to charming tales of maternal care, insects and spiders keep our gardens buzzing with adventure. Join bug and botanical portrait photographer, Danae Wolfe, on a journey through your garden to discover the stories of backyard bugs.

Friday Pre-Conference Workshop **Project WILD and Aquatic Project WILD** **12 July 19, 10:00-4:00**

The new Project WILD books are here, and it has been worth the wait! Get your copy and learn to adapt new classes and well as old favorites for small groups. If you are new to Project WILD, materials are provided free of charge by the ODNR Division of Wildlife and have been a staple of environmental education for over 20 years. This workshop is FREE, but you do need to register.

Cost: \$30, includes lunch

How to Register

Print out the registration form from wildernesscenter.org, fill it out, and send it in with your payment. You may also register with a credit card by calling 330.359.5235

Registration Deadline
06 July 19
